

AI YOU CAN TRUST. PERFORMANCE YOU CAN MEASURE.

While others bolt on AI, we've engineered it to drive real results, saving your team time, cutting down errors, and helping clinicians stay focused on care.

Automation, Not Add-ons

Careficient quietly powers your day behind the scenes, saving time, reducing errors, and accelerating cash flow. Our expert systems are embedded into every step of the workflow, from referral intake to billing, so your clinicians stay focused on care, not clicks.

Smarter Workflows That Scale With You

- Adaptive Forms: Context-aware forms display only what's relevant—fewer clicks, faster documentation.
- Built-In Compliance: Meets CMS, payer, and regulatory standards automatically.
- Faster Visits, Better Records: Clinicians spend less time documenting and more time with patients.

Intelligent Automation

- Auto-Import Referrals: Pre-loads patient history, contact info, and documents.
- Medication Carry-Forward: Keeps med lists accurate across transitions of care.
- Real-Time Eligibility & Address Checks: Catch issues at the source, before intake errors become claim denials.

Expert System Integrations

- PBM Syncs: Drug interaction checks and real-time med accuracy built in.
- EVV & Payroll Connectivity: Eliminate re-entry and reduce compliance risk.
- Revenue Cycle Efficiency: Instant remittance matching, claim alerts, and OIG checks.

The Careficient Difference

This isn't generic AI. It's purpose-built automation that understands how agencies actually operate. No separate modules. No complexity. Just seamless, intelligent performance baked into every part of your EMR.
