

What Is HOPE?

The Hospice Outcomes and Patient Evaluation (HOPE) model by CMS standardizes patient assessments and outcome reporting for hospice agencies. It reshapes how hospices document, measure, and report care delivery, and compliance is no longer optional.

How Careficient Supports You

Standardized Assessments

Data Submission & Reporting

Staff Training & Readiness

Outcome Reporting

- ✓ Use Careficient's built-in HOPE-compliant assessments to streamline patient evaluations and reduce manual errors.
- ✓ Leverage Careficient's integrated HIS/HOPE submission tools to keep your agency audit-ready.
- ✓ Equip your team with Careficient University and dedicated training to reduce resistance and improve documentation accuracy.
- ✓ Use Careficient's live dashboards to track and improve outcomes in line with HOPE requirements.

Why Careficient?

- HOPE Update Visits (HUV) and Symptom Follow-up Visit (SFV) visits can only be scheduled within their required timeframes, no overrides allowed.
- Moderate or severe symptoms trigger system checks for matching interventions and goals.

✓ **Stay compliant. Stay confident. Stay Careficient.**
